

Aerial Work Platform

Aerial Work Platforms - There are lots of accessories for forklifts which can be utilized to be able to help expand the capabilities of your forklift and allow you to pick up objects, handle materials with less effort or to accomplish clean-up tasks.

Some attachments were specially used for the blades themselves. For example, fork extensions are used whenever you require more fork length, which increases lifting capability. Blade extensions come in lengths ranging from 48-120 inches. Triangular or rounded attachments are one more kind utilized whenever moving rolled material so as to make sure it does not roll off of the standard flat blades.

Examples of lifting attachments comprise pivoting and telescoping crane or boom attachments. They can come in quite a few different styles and are normally utilized for moving lumber, poles, metal bars and different kinds of bulky stuff. Additional accessories like different kinds of hooks and hook plates are existing to be able to carry items using a sling or chain. Slab lifters and magnetic lifters are other stuff that can be used along with hook accessories. Slab lifters are specialized accessories that are used for lifting different materials that are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools which connect to your forklift to make transporting rolls of carpet easier. The attachment hooks onto the forklift's blades and has a pole that goes through the middle of the carpet roll.

There are numerous various types of lift truck accessories which could be utilized for facility maintenance such as snow forks. These forks attach to front end loaders and can transport materials like dirt, soil and snow. Other common cleanup accessories consist of standard sweepers and magnetic sweepers. Standard sweepers consist of a broom that the lift truck forks hook onto for sweeping large spaces like for instance parking lots or warehouse and factory floors. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in areas where there is lots of metal fragments such as on shop floors for example. Sweepers have widths as much as sixty inches and this surface area makes clean up quick and easy.

A material spreader is another lift truck accessory which is normally used at facilities. These spreaders are handy for a range of applications like for example spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Work platforms are another optional lifting attachment that a lot of businesses use on a daily basis. The platforms range in size from 36" x 36" to up to 60" x 60". There are some units available which are capable of folding up and storing into a smaller space. Work platforms are designed to raise employees up to an overhead location using the lift truck. Larger platform models have additional space for employees so as to carry tools and other necessary things intended for the task. Usually work platforms are made of poly material or steel.
