

## JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora started out on a cross country excursion in their RV. Newly retired, after spending many years working with his brother to build their crane company into an market leader, John had no idea that momentous trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road expedition.

While on their journey, John spent time conversing with past business associates whom the Groves stopped to visit along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John discovered an infinite marketplace for a product that could promptly and securely lift people in the air to accomplish maintenance and other building functions.

Upon returning from their travels, John formed a partnership with two friends and bought a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty workers, they manufactured and sold the first JLG aerial work platform. The business incorporates some of the simple design essentials of that original lift into existing designs.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove returned from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the business has extended itself into a number of international markets and continues to cultivate contemporary equipment to ensure that clients are able to become safer and more resourceful within their workplace.
